Mission

Girls Love Mail collects hand-written letters of encouragement for women newly diagnosed with breast cancer. (As of 9/20/21, the total letters collected and distributed over 200,000 letters, or **200,000 women encouraged**. [See the current total.](#))

Our Story

In 2009, author and founder of [Girls Love Mail](#), Gina L. Mulligan, was diagnosed with breast cancer. At the time Gina was working on an epistolary novel, a novel that is made up of all letters. While undergoing treatment and writing letters for her novel, she started receiving letters and cards filled with well wishes. Gina received over 200 letters, many from people she had never met. "Letters were all around me, and I realized letters are a precious gift with the power to heal," says Gina. She wanted to give back and started Girls Love Mail as a 501(c)3 in 2011 with the ultimately goal to get a letter to every woman diagnosed – that's 250,000 each year.

How it Works

Anyone with a desire to help can write a letter. Using the Girls Love Mail's Letter Writing Guidelines, writers pen letters on any paper or notecards of their choosing. They mail them to Girls Love Mail based in Folsom, CA where each is read for approval, packaged in a special envelope, bundled, and sent to caring staff at cancer centers and programs for distribution to patients.
